

Consulting – Analytics Trainee

About the Opportunity

Interested in creating mission critical solutions? Together with our other delivery centers around the world, we provide design, development, and sustainment services for our clients, both pre- and post-implementation. As a Trainee you'll get the chance to work on projects that will build on your technology and business skills, support organizations undergoing large-scale transformation, and help our clients achieve a higher level of service and business value.

You will be based in Queretaro, Mexico and be a part of the [ARDC \(America's Regional Delivery Center\) team](#), serving our clients with international operations, helping manage and support their global trade compliance requirements.

Deloitte Consulting ARDC is a member of the Global Delivery Network which has presence across the world with Delivery centers in the United States, Romania, India, Spain, China, and the Philippines. Deloitte has presence in Queretaro, Mexico City, Guadalajara, Monterrey, Aguascalientes and near cities around Mexico.

We provide consulting services to help our clients achieve a higher level of service in operational efficiency and business value. We are a team of professionals passionate about serving clients with distinction and learning, and we are driven by our purpose: making an impact that matters for our clients, our people, and society.

Work you'll do

As an **Analytics Trainee** you will be in a full-time intensive training program of 4-12 weeks in specific technologies, consulting skills, and a period of shadowing with our experts in Deloitte; at the end of this program, based on your performance, you can be eligible to obtain a full-time offer as an Analyst.

As a Trainee supporting analytics, you'll work with an experienced team to act as a strategic advisor to clients through project implementation support and application knowledge. Additionally, you will be involved in the following activities:

The Analytics Trainee believes data tells powerful stories. They enjoy performing exploratory data analysis and data processing to arrive at patterns to define analytical models. As part of America's Regional Delivery Center, they are part of a US team that is building an analytics dashboard to help their client identify top selling products and areas for improvement. They create dashboards using tools like Python, R Programming, Power BI, or Tableau and enjoy helping clients increase operational efficiency and create business value through the use of data.
